

Learn more about Legacy Max

Score Big with Legacy Max Enhanced Death Benefit Rider¹

Exclusively available on Enhanced Choice Index Plus

Your playbook for retirement

Imagine a game where every inning counts — where you're not just keeping score, but building your legacy. With Legacy Max, you get to play with two scorecards simultaneously, side by side.

Scorecard #1 keeps it simple. 6 runs every inning.

Scorecard #2 doubles your score. Take the actual runs scored during the inning and double it!

Your Legacy Max official runs scored for the inning is the greater of both scorecards. It's a win-win situation, ensuring your legacy grows inning after inning.

The game goes for at-least 7 years or until you reach 85 years-old — whichever comes later.

Price to play

The ticket prices represent the annual fee you pay to enjoy the benefits of Legacy Max. Your price to play varies by age. Here's how it works:

For issue ages up to 69, your ticket costs .80% of the annuity value each year.²

For issue ages 70-80, your ticket costs 1.20% of annuity value each year.²

Legacy Max is your ticket to retirement success. Play the game, build your legacy and enjoy the rewards for years to come.

Not FDIC-Insured • No Bank Guarantee • May Lose Value • Not Insured by Any Federal Government Agency • Not a Bank Deposit

Additional Legacy Max features:

- Available up to age 80 at issue
- RMD friendly
- Partial interest crediting available
- No medical underwriting

The death benefit base is limited to the greater of:³

- 125% of your surrender value excluding any market value adjustment.
- The total premium accumulated at 10% annually, but not to exceed 250% of the total premium — minus any withdrawals, including surrender charges.

How do withdrawals affect the benefit amount?

Non-qualified contracts funded with after-tax dollars:

Withdrawals will reduce the death benefit values in the same proportion that the withdrawal reduces the annuity value.⁴

Qualified contracts funded with pre-tax dollars:

Withdrawals up to the required minimum distribution amount will reduce the death benefit values dollar for dollar by the amount of the withdrawal. All other withdrawals will reduce the death benefit values in the same proportion that the withdrawal reduces the annuity value.

If death occurs in the middle of a year, what happens?

We'll recalculate the death benefit from the date of death to include partial-year interest crediting.

What are the payout options?

The death benefit payout options include:

- Lump sum
- Life income — with or without guarantee periods
- Joint and survivor income options — with or without guarantee periods
- Guaranteed income payments over a chosen period

Standard Insurance Company | 1100 SW Sixth Avenue, Portland, OR 97204 | standard.com

¹ May not be available in all states or for all distributions.

² The charge is deducted from the annuity value on each contract anniversary. It will be deducted proportionately from each index interest account and fixed interest account based on the percentage weight to the total annuity value.

³ This is referred to as the Death Benefit max in the contract.

⁴ Death benefit values include the death benefit base, guaranteed enhancement value, performance enhancement value and the death benefit max.

The Standard is a marketing name for StanCorp Financial Group, Inc. and subsidiaries. Insurance products are offered by Standard Insurance Company of Portland, Oregon in all states except New York. Product features and availability vary by state and are solely the responsibility of Standard Insurance Company.
