Standard Insurance Company (the “Company”) is a stock life insurance company domiciled in the State of Oregon and licensed to do business in all states except for New York. B. Use of Estimates in the Preparation of the Financial Statements

There was no significant change in the use of estimates for the first six months of 2018.

C. Accounting Policy

6) Loan-backed and structured securities are carried at the lower of amortized cost or fair value in accordance with the provisions of SSAP No. 43R – *Loan-Backed and Structured Securities*. For loan-backed and structured securities, the effective yield is based on estimated cash flows, including prepayment assumptions based on data from widely accepted third-party data sources. Significant changes in estimated cash flows from the original purchase assumptions are accounted for using the prospective method.

D. Going Concern

Based on management’s evaluation, there is no substantial doubt about the Company’s ability to continue as a going concern.

D. Loan-Backed Securities

(1) Prepayment assumptions for loan-backed and structured securities were obtained from independent pricing services or the Company's third-party asset manager.

(2) a. The Company recognized other-than-temporary impairments ("OTTI") for one loan-backed and structured security on the basis of the intent to sell for the first six months of 2018.

b. The Company did not recognize any OTTI on the basis of the inability or lack of intent to hold the loan-backed and structured securities for a period of time sufficient to recover the amortized cost basis for the first six months of 2018.

(3) The Company did not recognize any OTTI on loan-backed and structured securities where the present value of cash flows expected to be collected was less than the amortized cost basis for the first six months of 2018.

(4) As of June 30, 2018, all impaired fixed maturity securities (fair value is less than cost or amortized cost) for which an OTTI has not been recognized in earnings as a realized loss (including securities with a recognized OTTI for non-interest related declines when a non-recognized interest related impairment remains):

2. 12 months or longer	29,438,563

1. Less than 12 months	\$ 5,000,224,998
2. 12 months or longer	475,132,159

(5) The Company expects the fair value of the fixed maturity securities above to recover as the fixed maturity securities approach their maturity dates or sooner if market yields for such fixed maturity securities decline. The Company does not believe that any of the fixed maturity securities are impaired due to credit quality or due to any company or industry specific event. Based on the Company's evaluation of the securities and intent to hold the securities, and as it is unlikely that the Company will be required to sell the securities, none of the unrealized losses summarized above are considered other-than-temporary.

7. INVESTMENT INCOME

8. DERIVATIVE INSTRUMENTS

- A. The Company is exposed to the credit worthiness of the institutions from which it purchases its derivative instruments and these institutions' continued abilities to perform according to the terms of the contracts. For example, the current values for the credit exposure have been affected by fluctuations in the S&P 500 Index. The Company's maximum credit risk exposure would require an increase of 7.3% in the value of the S&P 500 Index. The maximum credit risk is calculated using the cap strike price of the Company's S&P 500 Index options less the floor price, multiplied by the notional amount of the S&P 500 Index options.

As the Company uses the Chicago Mercantile Exchange ("CME") to clear all of its interest rate swaps, the Company is only exposed to the default of the CME. Transactions with the CME require the Company to pledge or accept initial and variation margin collateral. The Company has pledged a fixed maturity security as collateral to the CME. The Company maintains beneficial ownership of the collateral which is classified as a fixed maturity security on Page 2, Line 1. The Company receives collateral related to its index options for over-the-counter derivative positions from certain counterparties which is classified as cash on Page 2, Line 5.

The following table sets forth collateral pledged to the CME for derivatives:

	<u>Cash</u>		<u>Fixed Maturity Securities</u>		<u>Total</u>	
	<u>6/30/2018</u>	<u>12/31/2017</u>	<u>6/30/2018</u>	<u>12/31/2017</u>	<u>6/30/2018</u>	<u>12/31/2017</u>

The following table sets forth collateral pledged to the Company for derivatives:

	<u>Cash</u>		<u>Fixed Maturity Securities</u>		<u>Total</u>	
	<u>6/30/2018</u>	<u>12/31/2017</u>	<u>6/30/2018</u>	<u>12/31/2017</u>	<u>6/30/2018</u>	<u>12/31/2017</u>

- B. The Company sells indexed annuities, which permit the holder to allocate their deposit between a fixed interest rate return and an indexed return, where interest credited to the contracts is based primarily on the performance of the S&P 500 Index, subject to an upper limit or cap and minimum guarantees. The index-based interest guarantees do not qualify for hedge accounting. Policyholders may elect to rebalance between interest crediting options at renewal dates annually. At each renewal date, the Company has the opportunity to re-price the indexed component by changing the cap, subject to minimum guarantees. The Company purchases index options for its interest crediting strategies used in its indexed annuity products. These index options do not qualify for hedge accounting. These investments are highly correlated to the portfolio allocation decisions of its policyholders, such that the Company is economically hedged with respect to index-based interest rate guarantees for the current reset period.

The Company uses interest rate swaps to reduce risks from changes in interest rates, to manage interest rate exposures arising from asset and liability mismatches, to protect against variability in future cash flows, and to protect the value of the Company's investments. By means of these contracts, the Company agrees with a counterparty to exchange, at specified intervals, the difference between fixed rate and floating rate interest amounts as calculated by reference to agreed notional amounts.

NOTES TO FINANCIAL STATEMENTS

- C. The Company designates and accounts for fair value hedges under hedge accounting when they have met the criteria requirements of SSAP No. 86 - *Derivatives*. To qualify for hedge accounting under SSAP No. 86, at the inception of the hedge, the Company documents its risk management objective and strategy for undertaking the hedging transaction, as well as its designation of the hedge as either: (i) a hedge of the estimated fair value of a recognized asset or liability (fair value hedge); or (ii) a hedge of a forecasted transaction or the variability of cash flows to be received or paid related to the recognized asset or liability (cash flow hedge). A derivative must be assessed as being highly effective in offsetting the designated risk of the hedged item. Hedge effectiveness is assessed at inception and throughout the life of the designated hedging relationship. In hedge transactions which qualify for hedge accounting, the change in the carrying value of the derivative is recorded in a manner consistent with the changes in the carrying value of the hedged item. In measuring effectiveness, no component of the derivative's gain or loss is excluded. Upon termination of a derivative that qualified for hedge accounting, the gain or loss is reflected as an adjustment to the basis of the hedged item and is recognized in income consistent with the hedged item.

If the Company chooses to not designate its derivatives for hedge accounting or designated derivatives no longer meet the criteria of an effective hedge, the changes in the fair value of the derivatives are included in "Change in net unrealized capital gains (losses)" without considering changes in the fair value of the hedged item. Accruals of interest income, expense and related cash flows on interest rate swaps are reported in "Net investment income". Upon termination of a derivative that does not qualify for hedge accounting, the gain or loss is included in "Net realized capital gains (losses)". In addition, when realized gains or losses on interest-rate related derivatives are recognized, they are amortized through the interest maintenance reserve.

- D. The Company's net unrealized capital gain from derivatives excluded from the assessment of hedge effectiveness was \$2.3 million as of June 30, 2018, compared to \$5.4 million as of December 31, 2017.
- E. The Company's derivatives that originally were designated for hedge accounting still qualified for hedge accounting as of June 30, 2018. Therefore, the Company did not recognize any unrealized gains or losses for the first six months of 2018 related to derivatives that no longer qualify for hedge accounting.
- F. The Company did not have any cash flow hedges as of June 30, 2018.

STATEMENT AS OF JUNE 30, 2018 OF THE STANDARD INSURANCE COMPANY
NOTES TO FINANCIAL STATEMENTS

14. LIABILITIES, CONTINGENCIES AND ASSESSMENTS

A. Contingent Commitments

- (1) The Company had commitments to fund partnership investments totaling \$45.8 million as of June 30, 2018. The contributions are payable on demand.

B. Assessments

- (1) Insolvency regulations exist in many of the jurisdictions in which the Company conducts business. Such regulations may require insurance companies operating within the jurisdiction to participate in guaranty associations. The associations levy assessments against their members for the purpose of paying benefits due to policyholders of impaired or insolvent insurance companies. In 2009, the Pennsylvania Insurance Commissioner placed long-term care insurer Penn Treaty Network America Insurance Company ("Penn Treaty") and its wholly-owned subsidiary, American Network Insurance Company ("ANIC") in rehabilitation and petitioned the state court for approval to liquidate both entities.

On March 1, 2017, the Commonwealth Court of Pennsylvania issued Orders of Liquidation for both Penn Treaty and ANIC. During the first quarter of 2017, the National Organization of Life & Health Insurance Guaranty Associations ("NOLHGA") reported total expected assessments from the liquidation, and the Company began to receive assessments from local jurisdictions. As of June 30, 2018, the Company had received and paid assessments from 45 states totaling \$12.0 million. Based on this information, the Company has recorded an asset of \$13.0 million for the expected recoverable and a liability of \$8.7 million for the expected assessments. The total expense recorded for this insolvency was \$7.6 million, comprised of \$7.7 million in expense for 2017, and a benefit of \$0.1 million for the first six months of 2018. The expense and the asset include assessments received and the remaining accrual. The Company will update the accrual as further details become available and as additional paid assessments are made throughout 2018 and beyond.

In accordance with statutory accounting pronouncement 2017-01 - *Discounting of Long-Term Care Guaranty Fund Assessments*, adopted March 16, 2017, companies are required to record accruals related to long-term care insolvencies on a discounted basis. NOLHGA has reported expected total assessments on both a discounted and undiscounted basis. Individual jurisdiction assessments received by the Company have been based on the discounted NOLHGA amount. Based on this and discussions with individual guaranty associations, the Company arrived at the above \$7.6 million pre-tax estimate using the discounted figures provided by NOLHGA. The Company does not expect that any difference between its current estimate and an undiscounted accrual balance would be material to the Company's financial position.

C. Gain Contingencies

The Company did not have any gain contingencies as of June 30, 2018.

D. Claims Related Extra Contractual Obligation and Bad Faith Losses Stemming from Lawsuits

The Company had no material claims relating to extra contractual obligations or bad faith losses from lawsuits as of June 30, 2018.

E. Joint and Several Liabilities

The Company did not have any joint and several liabilities as of June 30, 2018.

F. All Other Contingencies

In the normal course of business, the Company is involved in various legal actions and other state and Federal proceedings. A number of these actions or proceedings were pending as of June 30, 2018. In some instances, lawsuits include claims for punitive damages and similar types of relief in unspecified or substantial amounts, in addition to amounts for alleged contractual liability or other compensatory damages. In the opinion of management, the ultimate liability, if any, arising from the actions or proceedings is not expected to have a material effect on the Company's business, financial position, results of operations, or cash flows.

15. LEASES

See Schedule DB of the Company's quarterly and annual statements for additional detail.

- (2) The Company's financial instruments with off-balance sheet risk are swaps and options. Refer to Note 8 for information regarding these derivative contracts.
- (3) The Company is exposed to credit-related losses in the event of nonperformance by counterparties to financial instruments, but it does not expect any counterparties to fail to meet their obligations given their high credit ratings. Because the Company's swaps are cleared through a regulated exchange and positions are marked to market on a daily basis, the Company has little exposure to credit-related losses in the event of nonperformance by counterparties to such financial instruments.
- (4) The Company is required to pledge collateral related to the clearing of interest rate swap contracts through the CME. The amount of collateral that is required is determined by the exchange on which the interest rate swap is cleared. The Company currently pledges a fixed maturity security to satisfy the collateral requirement. Beginning in the first quarter of 2018 the Company began receiving collateral from its counterparties on its index option contracts to mitigate the risks.

(3) The Company recognizes transfers between fair value levels at the end of the reporting period.

(4) Valuation techniques and inputs used in the fair value measurement for assets and liabilities.

Assets and liabilities recorded at fair value are disclosed using a three-level hierarchy. The classification of assets and liabilities within the hierarchy is based on whether the inputs to the valuation methodology used for measurement are observable or unobservable. Observable inputs reflect market-derived or market-based information obtained from independent sources while unobservable inputs reflect the Company's estimates about market data.

The fair value hierarchy prioritizes the inputs to valuation techniques used to measure fair value into three broad levels: Level 1 inputs are based upon quoted prices in active markets for identical assets or liabilities that the Company can access at the measurement date. Level 2 inputs are based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active and model-based valuation techniques for which all significant assumptions are observable in the market. Level 3 inputs are generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect the Company's estimates of assumptions that market participants would use in pricing the asset or liability.

There are three types of valuation techniques used to measure assets and liabilities recorded at fair value:

- The market approach uses prices or other relevant information generated by market transactions involving identical or comparable assets or liabilities.
- The income approach uses the present value of cash flows or earnings.
- The cost approach, which uses replacement costs more readily adaptable for valuing physical assets.

The Company uses both the market and income approach in its fair value measurements. These measurements are discussed in more detail below.

STATEMENT AS OF JUNE 30, 2018 OF THE STANDARD INSURANCE COMPANY
NOTES TO FINANCIAL STATEMENTS

Fixed Maturity Securities

Fixed maturity securities are comprised of the following bond classes:

- U.S. government.
- U.S. states, territories and possessions.
- U.S. special revenues.
- Industrial and miscellaneous (unaffiliated).

The fixed maturity securities are diversified across industries, issuers and maturities. The Company calculates fair values for all classes of fixed maturity securities using valuation techniques described below. They are placed into three levels depending on the valuation technique used to determine the fair value of the securities.

The Company uses independent pricing services to assist management in determining the fair value of these assets. The pricing services incorporate a variety of information observable in the market in its valuation techniques, including:

- Reported trading prices.
- Benchmark yields.
- Broker-dealer quotes.
- Benchmark securities.
- Bids and offers.
- Credit ratings.
- Relative credit information.
- Other reference data.

The pricing services also take into account perceived market movements and sector news, as well as a fixed maturity security's terms and conditions, including any features specific to that issue that may influence risk, and thus marketability. Depending on the security, the priority of the use of observable market inputs may change as some observable market inputs may not be relevant or additional inputs may be necessary.

The pricing services provide quoted market prices when available. Quoted prices are not always available due to fixed maturity security market inactivity. The pricing services obtain a broker quote when sufficient information, such as security structure or other market information, is not available to produce a valuation. Valuations and quotes obtained from third-party commercial pricing services are non-binding and do not represent quotes on which one may execute the disposition of the assets.

The significant unobservable inputs used in the fair value measurement of the reporting entity's fixed maturity securities are valuations and quotes received from analytical reviews and broker quotes. Significant increases or decreases in any of those inputs in isolation would result in a significantly lower or higher fair value measurement. Generally, a change in the assumption used for the pricing evaluation is accompanied by a directionally similar change in the assumption used for the methodologies.

The Company performs control procedures over the external valuations at least quarterly through a combination of procedures that include an evaluation of methodologies used by the pricing services, analytical reviews, back testing of sales activity and the maintenance of a securities watch list. When necessary, the Company compares prices received from the pricing services to prices independently estimated by the Company utilizing discounted cash flow models or through performing independent valuations of inputs and assumptions similar to those used by the pricing service in order to ensure prices represent a reasonable estimate of fair value. Although the Company does identify differences from time to time as a result of these validation procedures, the Company did not make any significant adjustments as of June 30, 2018 or December 31, 2017.

The fair values for fixed maturity securities with a designated class of other than class 6 or 6FE that had other-than-temporary impairments were valued using Level 2 measurements. The Company principally uses the market and income approaches to measure these financial instruments at fair value. The Level 3 fixed maturity securities were valued using matrix pricing, independent broker quotes and other standard market valuation methodologies.

Commercial Mortgage Loans

For disclosure purposes, the fair values of commercial mortgage loans were estimated using a discounted cash flow valuation. The valuation includes both observable market inputs and estimated model parameters.

Significant observable inputs to the valuation include:

- Pricing for loans originated by StanCorp Mortgage Investors during the most recent quarter.
- U.S. Government treasury yields.
- The contractual terms of nearly every mortgage loan subject to valuation.

Significant estimated parameters include:

- The use of risk characteristics including stabilized debt coverage ratio and loan-to-value ratio.
- Variations in valuation spread between loans based on individual risk characteristics.

Valuations for commercial mortgage loans measured at fair value on a nonrecurring basis using significant unobservable Level 3 inputs are sensitive to a number of variables, but are most sensitive to net operating income and the applied capitalization rate. Generally, an increase or decrease resulting from a change in the stabilized net operating income from the collateralized property would result in a directionally similar change in the fair value of the asset. An increase or decrease in the assumption for the capitalization rate would result in a directionally opposite change in the fair value of the asset.

NOTES TO FINANCIAL STATEMENTS

Index Options

Index options were valued using Level 3 inputs. The fair value was determined using inputs that were not observable or could not be derived principally from, or corroborated by, observable market data. These inputs included assumptions regarding liquidity, estimated future cash flows and discount rates. Unobservable inputs to these valuations are based on management's judgment or estimation obtained from the best sources available. The Company's valuations maximize the use of observable inputs, which include an analysis of securities in similar sectors with comparable maturity dates and bond ratings. Broker quotes are validated by management for reasonableness in conjunction with information obtained from matrix pricing and other sources.

The Company calculated the fair value for its index options using the Black-Scholes option pricing model and parameters derived from market sources. The Company's valuations maximize the use of observable inputs, which include direct price quotes from the Chicago Board Options Exchange ("CBOE") and Overnight Indexed Swap rates, as reported by Bloomberg. Unobservable inputs are estimated from the best sources available to the Company and include estimates of future gross dividends to be paid on the stocks underlying the S&P 500 Index and other relevant indices, estimates of quoted market prices and the spread between the bid and ask prices, and estimates of implied volatilities on options. Valuation parameters are calibrated to replicate the actual end-of-day market quotes for options trading on the CBOE. The Company performs additional validation procedures such as the daily observation of market activity and conditions and the tracking and analyzing of actual quotes provided by banking counterparties each time the Company purchases options from them. Additionally, in order to help validate the values derived through the procedures noted above, the Company obtains indicators of value from representative investment banks.

While valuations for the index options are sensitive to a number of variables, valuations for index options purchased are most sensitive to changes in the estimates of bid ask spreads, or the indices' value, and the implied volatilities of these indices. Significant fluctuations in any of those inputs in isolation would result in a significantly lower or higher fair value measurement. Generally, an increase or decrease used in the assumption for the implied volatilities and in the indices' value would result in a directionally similar change in the fair value of the asset.

Separate Account Assets

Separate account assets represent segregated funds held for the exclusive benefit of contract holders. The activities of the account primarily relate to participant-directed 401(k) contracts. Separate account assets are recorded at fair value on a recurring basis, with changes in fair value recorded to separate account liabilities. Separate account assets consist of mutual funds. The mutual funds' fair value is determined through Level 1 and Level 2 inputs. The majority of the separate account assets are valued using quoted prices in an active market with the remainder of the assets valued using quoted prices from an independent pricing service. The Company reviews the values obtained from the pricing service for reasonableness through analytical procedures and performance reviews.

Index-based Interest Guarantees

The Company uses the income approach valuation technique to determine the fair value of index-based interest guarantees. The liability is the present value of future cash flows attributable to the projected index growth in excess of cash flows driven by fixed interest rate guarantees for the indexed annuity product. Level 3 assumptions for policyholder behavior and future index crediting rate declarations significantly influence the calculation. Index-based interest guarantees are included in aggregate reserves on the Company's liabilities, surplus and other funds.

Valuations for the index-based interest guarantees are sensitive to a number of variables, but are most sensitive to the S&P 500 Index value, the implied volatilities of this index and the interest rate environment. Generally, a significant increase or decrease used in the assumption for the implied volatilities and in the S&P 500 Index value would result in a directionally similar change, while an increase or decrease in interest rate environment would result in a directionally opposite change in the fair value of the liability.

Interest Rate Swaps

Interest rate swaps are used in hedging relationships and are recorded in a manner that is consistent with the hedged item if they qualify for hedge accounting or at fair value if they do not qualify or are not designed to qualify for hedge accounting. The estimated fair value of the interest rate swaps is determined through a pricing model. The interest rate swaps qualify as Level 2 under the fair value hierarchy since their valuation is based on a model for which all significant assumptions are observable in the market.

(5) Fair value measurements of derivative assets and liabilities as of June 30, 2018 are included in 20.A.(1) and 20.A.(2).

B. The Company provides additional fair value information in Notes 5, 8, 10 and 11.

On January 1, 2018, the Company will be subject to an annual fee under Section 9010 of the federal Affordable Care Act (“ACA”). This annual fee will be allocated to individual health insurers based on the ratio of the amount of the entity’s net premiums written during the preceding calendar year to the amount of health insurance for any U.S. health risk that is written during the preceding calendar year. A health insurance entity’s portion of the annual fee becomes payable once the entity provides health insurance for any U.S. health risk for each calendar year beginning on or after January 1 of the year the fee is due. As of December 31, 2017, the Company has written health insurance subject to the ACA assessment, expects to conduct health insurance business in 2018, and estimates their portion of the annual health insurance industry fee to be payable on September 30, 2018 to be approximately \$2.4 million. The ACA also requires the Company, in the data year, to reclassify from unassigned surplus to special surplus funds an amount equal to its estimated subsequent year fee assessment. The Company evaluates the collectability of the amounts on deposit with the reinsurer by monitoring the value of assets held in trust and the credit quality of the counterparty. The amount of assets required to be maintained in the trust is determined quarterly.
